

G2P
GENOMES TO PEOPLE

**INSIDER
SPOTLIGHT**

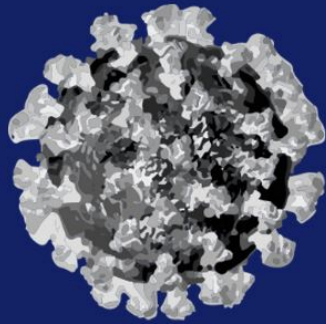

CLINICAL Video footage from a [CNBC documentary](#) features the [Brigham Preventive Genomics Clinic](#) as an innovative service using the "DNA-first" approach to prevent disease. Now open for telemedicine!

NEWS [Patient education](#) is vital when disclosing genetic risk information. The impact of online education resources are actively being studied.

PUBLICATIONS We describe a novel strategy for [quantifying downstream healthcare utilization](#) after genomic testing for our BabySeq participants.

The COVID-19 Host Genetics Initiative

RESEARCH In response to the pandemic, we have joined 189 research groups worldwide to form the [COVID-19 Host Genetics Initiative](#). This consortium is facilitating unprecedented data sharing to identify how human genetics impact COVID-19 disease severity.

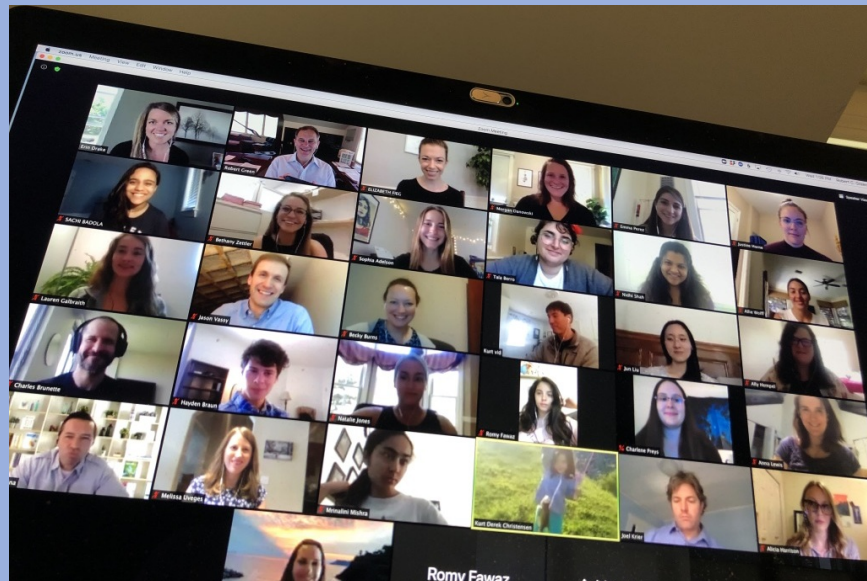

BLOG Although an integral healthcare profession, [genetic counseling](#) is still met with barriers because GCs are not recognized by Medicare, the largest insurance provider in the U.S.

PRESENTATIONS Many of our presentations are transitioning to a virtual format. Check out [a full listing](#) of past and future G2P speaking engagements.

Support Our Research!

Please consider making a tax-deductible gift to help accelerate the implementation of genomic medicine and the promise of precision health.

Give today!

Donations support our current research projects in genomics and personalized medicine to predict and prevent conditions like cancer, heart disease and Alzheimer's, in addition to training junior faculty and students.
