CONFERENCES Ilham Abbasi (G2P research trainee, mentored by Dr. Nina Gold) presented at ACMG 2024 in Toronto on “Returning genomic risk for hereditary breast and ovarian cancer: Clinical outcomes through standard of care versus research return of results.” Additional conference presenters include distinguished G2P collaborators; Nina Gold, MD and Kurt Christensen, PhD.

PRESS On Rare Disease Day 2024, [CBS News reported](#) on the BabySeq Project in [an interview with Dr. Robert Green](#) and participants from the project. Dr. Green shared his hopes for more screening for genetic conditions in newborn babies.

SAVE THE DATE for ICoNS '24, the third annual meeting of the International Consortium on Newborn Sequencing in [NYC on October 9 and 10](#), with abstract & poster submissions opened on March 18 and general attendance registration available on April 15. While you wait, relive the excitement of ICoNS '23 by viewing [session recordings](#) from the Royal Institution in London.

PUBLICATIONS Drs. Nina Gold and Robert Green published a forward-looking commentary "[Ready or not, genomic screening of fetuses is already here](#)" in Genetics in Medicine, in which they discuss how genomic sequencing is a tremendous asset in prenatal diagnosis and for healthcare equity among patients who might be unaware of this technology.

BLOG This month, G2P Social Media Manager Pakhi Dixit published a touching [tribute blog to Franca Sozzani](#), the former editor-in-chief of Vogue Italia. The blog commemorates five years of the Franca Sozzani Fund for Preventive Genomics and reflects on Ms. Sozzani's indelible mark on philanthropy.
